Applicant respectfully requests that the Examiner consider the listed documents and indicate that they were considered by making appropriate notations on the attached form.

With respect to the non-English language documents, Applicant submits the following remarks:

1. **DE 101 18 304 A1** discloses a pattern for coding information on a surface. The information coded may be a position on the surface. Information is coded using square or rectangular pixels, which are diagonally divided into triangles. By selectively dyeing either the triangle above or below the diagonal of a pixel, the pixel will code either a "0" or "1". DE 101 18 304 A1 also discloses that a pen may be used to read the coding pattern.

This submission does not represent that a search has been made or that no better art exists and does not constitute an admission that each or all of the listed documents are material or constitute "prior art." If the Examiner applies any of the documents as prior art against any claims in the application and Applicant determines that the cited documents do not constitute "prior art" under United States law, Applicant reserves the right to present the relevant facts and law regarding the appropriate status of such documents.

Applicant further reserves the right to take appropriate action to establish the patentability of the disclosed invention over the listed documents, should one or more of the documents be applied against the claims of the present application.

If there is any fee due in connection with the filing of this Statement, please
charge the fee to Deposit Account No. 06-0916.

Respectfully submitted,
